DETAILED ACTION

1. The election filed on June 26, 2001 in Paper No. 10 is acknowledged and has been entered.

2. Claims 1-32, 40, 41, and 44-89 are pending in the application and are currently subject to restriction.

Election/Restrictions

- 3. Applicant's request in Paper No. 10 for reconsideration of the restriction requirement made in the previous Office Action (Paper No. 8) is acknowledged. Upon consideration of the record in view of Applicants' remarks, the restriction requirement made in the previous Office Action is withdrawn and a new restriction requirement is set forth below.
- 4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Group 1. Claims 1-32, drawn to a method for treating cancer, classified in class 424, subclass 178.1 and class 514, subclass 1.
 - Group 2. Claims 40, 41, and 44-89, drawn to a composition and a kit, classified in class 424, subclass 178.1 and 514, subclass 1.
- 5. The inventions are distinct, each from the other because of the following reasons:

The inventions in Groups 1 and 2 are not at all related because the products of Group 2 are not specifically used in any of the steps of the claimed methods in Group 1.

If the inventions of Group 1 and 2 were related as product and process of use, the inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that

Art Unit: 1642

product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product, namely methotrexate.

- 6. Because these inventions are distinct for the reasons given above and the search required for examination of one group is not co-extensive with the search required for examination of the other, restriction for examination purposes as indicated is proper.
- 7. This application contains claims directed to patentably distinct species of the claimed invention.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Currently, claims 1, 8, 10, 16, 19, 21, 23, 25, 40, 41, 46, 48, 54, 57, 59, 61, 63, 68, 70, 76, 79, 81, and 85 are generic.

Claim 1 is drawn to patentably distinct species of the invention, wherein the cancer is a cancer of the (a) breast (claim 2), (b) colon (claims 2 and 5), (c) lung (claims 2 and 3), (d) prostate (claim 2), (e) kidney (claim 2), (f) pancreas (claim 2), (g) brain (claim 2), (h) bones (claim 2), (i) ovary (claim 2), (j) testes (claim 2), or (k) a lymphatic organ (claim 2).

Claim 1 is further drawn to patentably distinct species of the invention, wherein the antimitotic agent is (a) a maytansinoid (claim 6), (b) a Vinca alkaloid (claim 8), (c) a dolastatin (claim 8), or (d) a cryptophycin (claim 8).

Claim 8 is drawn to patentably distinct species of the invention, wherein the Vinca alkaloid is (a) vincristine, (b) vinblastine, (c) vindesine, or (d) navelbine (claim 9).

Claim 8 is further drawn to patentably distinct species of the invention, wherein the dolastatin is (a) dolastatin 10 or (b) dolastatin 15 (claim 9).

Claim 8 is further drawn to patentably distinct species of the invention, wherein the cryptophycin is (a) cryptophycin 52 or (b) cryptophycin 1 (claim 9).

Claim 10 is drawn to patentably distinct species of the invention, wherein the monoclonal antibody or fragment thereof is (a) humanized N901 or (b) humanized C242 (claim 14).

Application/Control Number: 09/671,995

Art Unit: 1642

Claim 1 is further drawn to patentably distinct species of the invention, wherein the chemotherapeutic agent is (a) a taxane (claim 16), (b) a compound that acts through a taxane mechanism (claim 18), (c) a platinum compound (claim 21), (d) a camptothecin compound (claim 25), or (e) a compound that inhibits DNA topoisomerase I (claim 27).

Claim 16 is drawn to patentably distinct species of the invention, wherein the taxane is (a) paclitaxel or (b) docetaxel (claim 17).

Claim 19 is drawn to patentably distinct species of the invention, wherein the epothilone is (a) epothilone A, (b) epothilone B, (c) epothilone C, (d) epothilone D, (e) epothilone E, or (f) epothilone F (claim 20).

Claim 21 is drawn to patentably distinct species of the invention, wherein the platinum compound is (a) cisplatin, (b) carboplatin, (c) oxaliplatin, (d) iproplatin, (e) ormapaltin, or (f) tetraplatin (claim 22).

Claim 23 is drawn to patentably distinct species of the invention, wherein the epipodophyllotoxin is (a) etoposide or (b) teniposide (claim 24).

Claim 25 is drawn to patentably distinct species of the invention, wherein the campotothecin compound is (a) camptothecin, (b) toptecan, (c) irinotecan, or (d) 9-aminocamptothecin (claim 26).

Claim 40 is drawn to patentably distinct species of the invention, wherein the anti-mitotic agent is (a) a maytansinoid (claim 44), (b) a Vinca alkaloid (claim 46), (c) a dolastatin (claim 46), or (d) a cryptophycin (claim 46).

Claim 46 is drawn to patentably distinct species of the invention, wherein the Vinca alkaloid is (a) vincristine, (b) vinblastine, (c) vindesine, or (d) navelbine (claim 47).

Claim 46 is further drawn to patentably distinct species of the invention, wherein the dolastatin is (a) dolastatin 10 or (b) dolastatin 15 (claim 47).

Claim 46 is further drawn to patentably distinct species of the invention, wherein the cryptophycin is (a) cryptophycin 52 or (b) cryptophycin 1 (claim 47).

Claim 48 is drawn to patentably distinct species of the invention, wherein the monoclonal antibody or fragment thereof is (a) humanized N901 or (b) humanized C242 (claim 52).

Claim 40 is further drawn to patentably distinct species of the invention, wherein the chemotherapeutic agent is (a) a taxane compound (claim 54), (b) a compound that acts through a

Application/Control Number: 09/671,995

Art Unit: 1642

taxane mechanism (claim 56), (c) a platinum compound (claim 59), (d) a camptothecin compound (claim 63), or (e) a compound that inhibits DNA topoisomerase I (claim 65).

Claim 54 is drawn to patentably distinct species of the invention, wherein the taxane is (a) paclitaxel or (b) docetaxel (claim 55).

Claim 57 is drawn to patentably distinct species of the invention, wherein the epothilone is (a) epothilone A, (b) epothilone B, (c) epothilone C, (d) epothilone D, (e) epothilone E, or (f) epothilone F (claim 58).

Claim 59 is drawn to patentably distinct species of the invention, wherein the platinum compound is (a) cisplatin, (b) carboplatin, (c) oxaliplatin, (d) iproplatin, (e) ormapaltin, or (f) tetraplatin (claim 60).

Claim 61 is drawn to patentably distinct species of the invention, wherein the epipodophyllotoxin is (a) etoposide or (b) teniposide (claim 62).

Claim 63 is drawn to patentably distinct species of the invention, wherein the campotothecin compound is (a) camptothecin, (b) toptecan, (c) irinotecan, or (d) 9-aminocamptothecin (claim 64).

Claim 41 is drawn to patentably distinct species of the invention, wherein the antimitotic agent is (a) a maytansinoid (claim 66), (b) a Vinca alkaloid (claim 68), (c) a dolastatin (claim 68), or (d) a cryptophycin (claim 68).

Claim 68 is drawn to patentably distinct species of the invention, wherein the Vinca alkaloid is (a) vincristine, (b) vinblastine, (c) vindesine, or (d) navelbine (claim 69).

Claim 68 is further drawn to patentably distinct species of the invention, wherein the dolastatin is (a) dolastatin 10 or (b) dolastatin 15 (claim 69).

Claim 68 is further drawn to patentably distinct species of the invention, wherein the cryptophycin is (a) cryptophycin 52 or (b) cryptophycin 1 (claim 69).

Claim 70 is drawn to patentably distinct species of the invention, wherein the monoclonal antibody or fragment thereof is (a) humanized N901 or (b) humanized C242 (claim 74).

Claim 41 is further drawn to patentably distinct species of the invention, wherein the chemotherapeutic agent is (a) a taxane compound (claim 76), (b) a compound that acts through a taxane mechanism (claim 78), (c) a platinum compound (claim 81), (d) a camptothecin compound (claim 85), or (e) a compound that inhibits DNA topoisomerase I (claim 87).

Art Unit: 1642

Claim 76 is drawn to patentably distinct species of the invention, wherein the taxane is (a) paclitaxel or (b) docetaxel (claim 77).

Claim 79 is drawn to patentably distinct species of the invention, wherein the epothilone is (a) epothilone A, (b) epothilone B, (c) epothilone C, (d) epothilone D, (e) epothilone E, or (f) epothilone F (claim 80).

Claim 81 is drawn to patentably distinct species of the invention, wherein the platinum compound is (a) cisplatin, (b) carboplatin, (c) oxaliplatin, (d) iproplatin, (e) ormapaltin, or (f) tetraplatin (claim 82).

Claim 83 is drawn to patentably distinct species of the invention, wherein the epipodophyllotoxin is (a) etoposide or (b) teniposide (claim 84).

Claim 85 is drawn to patentably distinct species of the invention, wherein the campotothecin compound is (a) camptothecin, (b) toptecan, (c) irinotecan, or (d) 9-aminocamptothecin (claim 86).

- 8. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.
- 9. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
- 10. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Application/Control Number: 09/671,995 Page 7

Art Unit: 1642

11. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR

1.143).

12. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Stephen L. Rawlings, Ph.D. whose telephone number is (703)

305-3008. The examiner can normally be reached on Monday-Thursday, alternate Fridays,

8:00AM-5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Anthony C. Caputa, Ph.D. can be reached on (703) 308-3995. The fax phone

numbers for the organization where this application or proceeding is assigned are (703) 308-

4242 for regular communications and (703) 308-4242 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 308-0196.

Stephen L. Rawlings, Ph.D.
